About Me

Self-taught full-stack developer passionate about building real-world systems, frameworks, and smart devices. I specialize in backend APIs, embedded systems, and modern web architectures.

Skills

- ✦ PHP (Custom Framework)
- ✦ Node.js / NestJS
- ✦ Prisma ORM
- ✦ RESTful APIs
- ✦ MySQL / PostgreSQL
- ✦ Arduino / ESP32 / IoT
- ✦ HTMX, HTML/CSS/JS
- ✦ Python + OpenCV
- ✦ Android Native Development
- ✦ Firebase, Git, Postman

Projects

- ✦ Custom PHP Framework (HTMX-ready)
- ✦ SaaS Inventory System (NestJS + Prisma)
- ✦ Delphi FMX Games (Minesweeper, Amazons)
- ✦ IoT Systems (Sensors, ESP32, WiFi control)
- ✦ Android Utility Apps (Published)

Learning Philosophy

> “Build real things. Break them. Fix them. That’s how you learn.”

Reading docs, experimenting, learning from open-source projects, and using courses only when necessary.

Languages

AE Arabic: Native

GB English: Intermediate

Vision

I don’t just build software – I build with **purpose**. My goal is to leave a positive mark in the world through technology.
